

LIFTEKNIC

SELECTION

Lifteknik is a respected name associated with the design of advanced lift control technology.

Recent evolution has enabled us to expand and shape our product portfolio in line with market demands.

Our new philosophy embraces our ground up designs but also forges technology partnerships to enable us to provide a more comprehensive and competitive product range.

The result is a portfolio of products ranging from simple **Traclite** Low cost traction and **Hylite** hydraulic controllers to the extremely adaptable medium to high end **Qube** range.

Hylite Traclite

Examples of standard Qube features

- Simplex, Duplex, up to 8 Lifts Dispatcherless.
- Landing riser cables supplied pre-wired to allow fast installation time.
- Open loop, Closed Loop & Gearless Machine compatibility
- All configuration parameters and Timers are adjustable from MMI
- Car and Landing call entry from MMI
- Floor security from MMI
- Built in Fault Logger recording up to 100 events with help text
- Real Time clock with date.
- EMOP Panel test pendant.
- Built in Journey and Door operations counters.
- Fully identified controller wiring.
- Fully EN81-70 compliant
- Handwinding Visual Audible floor level indication.

We have not only expanded our lift controller range, but have recognised the increasing demand for complete electrical solutions for all lift associated products including : -
 Communication systems, Autodiallers, Indicators, Cabling, Shaft equipment, COP's, Pushes and Signals.

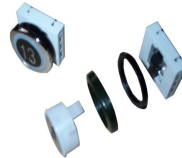

We make sure that every product from the Lifteknik selection range conforms with today's appropriate legislation e.g. EN81-28, EN81-70, EN12015:2004, EN12016:2004

Prices Start From

Hylite Hydraulic controller	£2200
Traclitex VF controller	£2985
Auto dialler Lift Telephones	£230
Surface mount Landing Station	£80
Push Buttons	£11

It is important to us that our customers are completely satisfied with our products and services. We feel that there is more to a sale than just a competitive price, therefore every product is backed and supported here in the U.K by our dedicated technical support team
